

DAI VIET HUNG TRAN

AI / Computer Vision Researcher & Software Engineer

Gwangjin-gu, Seoul, South Korea | 010-9597-6223 | trandaiviethung2001@gmail.com

LinkedIn: Dai Viet Hung Tran | Portfolio: <https://trandaiviethung2001.github.io/>

PROFESSIONAL SUMMARY

Computer Science researcher and software engineer with hands-on experience in computer vision, deep learning, AI systems, and software development. Currently pursuing an M.S. in Computer Science at Sejong University while working as a Research Assistant on conditional image generation and object detection. Prior experience includes XR research, applied AI engineering, benchmark project management, and research-oriented software development. Strong foundation in Python, C/C++, Java, Swift, JavaScript, PyTorch, TensorFlow, Flask, FastAPI, SQL, Docker, and modern AI/computer vision workflows.

TECHNICAL SKILLS

Programming: Python, Java, C++, C, Swift, JavaScript

Web / Backend: HTML, CSS, Flask, FastAPI

AI / ML: PyTorch, TensorFlow, scikit-learn, LangChain, Machine Learning, Deep Learning, Computer Vision, YOLOv8, OpenCV, Roboflow

Data / Databases: NumPy, Pandas, SQL, MySQL, Azure SQL, MongoDB, KNIME

DevOps / Tools: Docker

Languages: Vietnamese, English, Korean, German

PROFESSIONAL EXPERIENCE

Research Assistant | Sejong University

Aug 2026 - Present

Seoul, South Korea

- Conduct research and development in conditional image generation and object detection, including experimentation and evaluation of AI-driven computer vision solutions.

Project Manager | EBIT

May 2026 - Aug 2026

Seoul, South Korea

- Managed multilingual AI and benchmark projects, coordinating delivery, quality assurance, and cross-functional execution before client handoff.

AI Engineer | EBIT

Dec 2025 - Aug 2026

Seoul, South Korea

- Designed and developed applied AI systems for specialized requirements, with emphasis on reliable technical workflows and delivery quality.

Student Researcher, XR Research Laboratory | Sejong University

Mar 2025 - May 2026

Seoul, South Korea

- Conducted deep learning and machine learning research using Python and KNIME; supported experimental AI research and model-oriented development.

Software Development Intern | Sejong University

Sep 2023 - Mar 2025

Seoul, South Korea

- Developed software involving computer vision and artificial intelligence while building practical experience in research-oriented software development.

AI Programmer | Outlier

Dec 2024 - Mar 2025

Remote

- Evaluated and improved AI prompts and responses for Python programming tasks, focusing on technical correctness and response quality.

EDUCATION

Master of Science in Computer Science | Sejong University

2026 - Present

Seoul, South Korea

Focus: Artificial Intelligence, Computer Vision, Machine Learning, and software engineering.

Bachelor of Computer Science | Sejong University

2022 - 2026

Seoul, South Korea

Academic focus: Artificial Intelligence, Computer Vision, Machine Learning, and software engineering.

SELECTED FOCUS AREAS

Computer Vision | Object Detection | Conditional Image Generation | Deep Learning | Machine Learning | AI Systems
